Prompt Overview

The beloved City of Cupertino provides various locations for our citizens to live comfortably and relax. One of these locations is the renowned Cupertino Library. In recent years, there have been discussions regarding the development of a Program Room in the library, with a diverse array of uses and purposes. It is your job this year to design the perfect Program Room by detailing its necessary uses and applications, and what kind of equipment and facilities it would need.

Program Room

- This is the only topic you can do this year
 - One topic for all participants
- Program Room will be located in the area behind the story room
 - Exact dimensions will be sent out soon
- The purpose of program room is to provide a space for our community to use for their desires
 - Such as projects, movie nights, events etc.

Data Gathering

- Interviews should be conducted at various locations
 - Other program rooms in the area or even outside of the country (more diversity = better)
- Try to interview as many different age groups as possible
 - Looping back to more diversity
 - More perspectives to work with
- Design an experiment
 - Surveys or any other way to understand who would like to use the program room at what time

Data Gathering

People to Interview

- It's hard to find good interviewees
 - Make sure you get variety of responses
 - 5 minimum ≠ interview 5 people
- Interview Etiquette
 - Be nice
 - Remember, they're taking time out of their day to be a part of your interview
 - Respect Their Choice
 - If an interviewee doesn't want to be part of the interview, it's completely fine

Individual Work, Q/A

- You now have time to work individually
- If you would like a group...
 - Interact with your peers
- Work together, if you would like
- Ask questions to TAC members
